Revised Visitor Guidelines for the Adult Ambulatory Clinics

All employees:

- Ensure proper social distancing is maintained in common areas and in the clinics
- Will check with the patient’s care team before turning a patient away due to an inability to comply with these guidelines

All patients and visitors:

- Will be screened for symptoms of and exposure to COVID-19
- Should bring their own mask and wear it for the entirety of the visit. Masks will be available for those who forget to bring them.
- Will maintain appropriate social distancing

Specific restrictions:

1. Adult Patients in Ambulatory Care Clinics and Departments:

   One visitor/caregiver will be permitted to accompany an adult patient to an appointment.

2. OB/GYN Patients in Ambulatory Care Clinics and Departments:

   One visitor/caregiver will be permitted to accompany a patient to an OB/GYN appointment. No children will be permitted unless the child has an appointment or is a newborn accompanying the patient to her visit.

3. Pediatric Patients in Adult Ambulatory Care Clinics and Departments:

   Will follow the Children’s of Mississippi Guidelines. Currently – 2 visitors will be permitted to accompany a pediatric patient. Siblings and other family members are discouraged but exceptions are made on a case by case basis.
