ACCESSING ON UMMC ISSUED DEVICE

Accessing Encrypted Media on a UMMC Issued Device

Procedure

1. Login to your computer and insert any protected removable storage device. The encryption software will detect the media is protected and prompt you for the media password.

Enter External Media Password	
DECL Data Protection Encryption	
Please enter the password assigned to this external media device.	
If you select "Cancel", you will be granted read-only access to unencrypted data on the device, but you will have no access to encrypted data.	
Volume: CREDANT (H:\)	
Password: *******	
I Forgot OK Cancel	

- 2. Enter the password for the media and click "OK".
- 3. You may now interact with the media just as you would normally. Simply navigate to Windows Explorer or access the device from any Windows application.
