

HOW TO ACCESS YOUR JUMP DRIVE ON A DIFFERENT COMPUTER

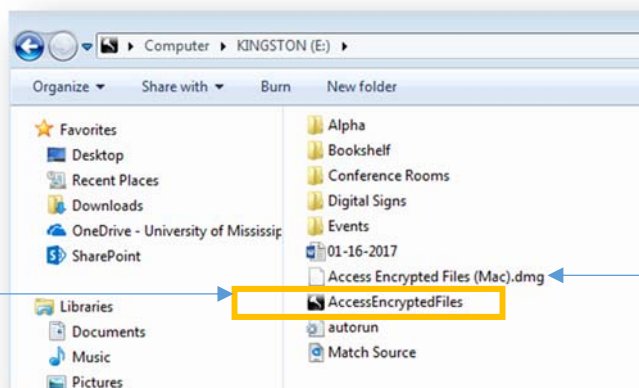

Accessing Encrypted Media on a different computer

Procedure

1. Insert the jump drive (encrypted removable device).
2. If AutoRun is enabled, Windows will prompt you to run the Access Encrypted Files utility by clicking "Run EMS Explorer".

3. If you are not prompted, go to the Windows Explorer and double click "AccessEncryptedFiles.exe".

Use this file if you are on a Mac.

4. If prompted, enter the password for the jump drive (encrypted removable device).
5. To edit encrypted files you must copy them to your computer. Once edits have been made then you can move them back to the jump drive.
