

This Week in the CRRC

SEPTEMBER 20, 2020

Physiology professor to examine HTN's autoimmune underpinnings

Dr. Michael J. Ryan, UMMC professor of physiology and biophysics, will present the virtual seminar, "Hypertension: A Disease with Autoimmune Underpinnings," at 3 p.m. on Monday, Sept. 21, online via Big Blue Button.

Postdoc fellow to measure dietary, NR4A2's hypertrophy impact

Dr. Sadia Ashraf, postdoctoral fellow, will give the UMMC Department of Physiology and School of Medicine Seminar Series presentation, "Impact of Dietary Composition and NR4A2 on Pressure Overload-induced Hypertrophy," at noon on Wednesday, Sept. 23, online via Big Blue Button.

There will be no CRRC WIP Meeting This Week

Congratulations to Osvaldo Rivera-Gonzalez, Graduate Assistant in the Department of Physiology & Biophysics. He is the recipient of an F31 grant from the NIDDK entitled, "Endothelin in Obesity-Induced Insulin Resistance" He will be

studying the role of ET-1 and its receptor subtypes, ET_A and ET_B, in insulin resistance.
