

An illustration showing three stylized figures climbing a set of three blue blocks of increasing height. The tallest figure is on the highest block, celebrating with arms raised. The middle figure is on the second block, and the shortest figure is on the first block. There are small potted plants on the base of the blocks. The background is a large orange circle with smaller yellow and blue shapes.

PROJECT NEWSLETTER UPDATE

The calendar has turned to December in a year that no one could have predicted! Despite the global pandemic, we have been able to steadily deliver Workday functionality - Supply Chain, Accounts Payable, Assets, Student Recruiting and Student Admissions - and we have seen UMMC's use of the system steadily increase.

We handled about 3.3 million transactions in Workday in January of 2020 and by October, we were over 9 million transactions. We are already looking ahead to another exciting year of Workday deployments in 2021 as the remainder of the Workday Student operations move from legacy systems over to Workday. The team is working hard every day to Make your Workday Count!

Where are we in the project?

The Workday Student Project team has been very busy completing User Experience Sessions. These sessions proved to be a great opportunity to work through the system and how it has been configured. Tasks for the Move-to-Production 2 have begun in earnest. These will continue through January. See Wave 3 features below!
