

# PROJECT NEWSLETTER UPDATE

2021 is off to a great start! By the time this newsletter is published, we will have brought our next batch of Workday Student functionality live and will be in the midst of command center activities as we work through the go-live. This is a huge step for our Workday Student team but it's not the finish line for them - there will be more go-lives in the coming months as more and more functionality is enabled for our students and our staff that support the education mission at UMMC. Congratulations to the team on their accomplishment and a big thank you for their work to Make Your Workday Count!

## Where are we in the project?

The second milestone of the Workday Student project is now live! This includes:

- Student Personal Data: Students can view and update personal information
- Curriculum Management: Administrators can initiate course modifications and maintain instructor eligibility
- Financial Aid: Office of Financial Aid will begin packaging student awards for 2021-2022 in Workday.

More functionality is coming in February and March 2021! This includes new student onboarding, event planning, financial aid engagement plans and action items, and student holds.

The third milestone coming in April will bring the launch of student registration for summer 2021-2022.
