

Department of Pathology

Required On-Line Training

All residents are required to complete the following on-line training. Failure to complete required on-line training is considered a lack of professionalism and may result in disciplinary actions.

- Healthstream modules as they are assigned by the University of Mississippi Medical Center (including annual institutional compliance training). A quarterly notice is sent to the residency program director indicating resident compliance with completion of these modules. *To log on to Healthstream, go to the “Hot Spots” icon on the UMMC intranet page and click “Healthstream”. Both your log in user ID and password are your employee ID number. Go to the “My Learning” tab to see a list of assigned courses.*
- Collaborative Institutional Training Initiative (CITI) Human Subjects Research Training. This on-line training is required for participation in human subjects research at our institution and for access to the IRB Ideate system. *To register for the course, go to www.citiprogram.org and follow the instructions for registration. Choose the “Human Subjects Research” course. This course must be renewed annually. You will receive an email indicating when your certification is going to expire.*
