

Curriculum Vitae

Personal Information

NAME: Jussara M. do Carmo

ADDRESS:

Home: 221 Fairview Drive, Brandon, MS 39047

Work: Department of Physiology and Biophysics – University of Mississippi
Medical Center, 2500 North State Street, Jackson, MS 39216

PHONE:

Home: (601) 214 8071

Office: (601) 984 4353

Fax: (601) 984-1817

EMAIL: jdocarmo@umc.edu

EDUCATION/TRAINING

INSTITUTION AND LOCATION	DEGREE	YEAR(s)	FIELD OF STUDY
State University of Paraiba, Brazil	Bachelor	1993	Physical Therapy
Federal University of Pernambuco, Brazil	M.S.	1999	Physiology
University of Sao Paulo	Ph.D.	2006	Physiology
Univ. Mississippi Medical Center, Jackson, MS		2006-08	Postdoctoral Fellow
Univ. Mississippi Medical Center, Jackson, MS		2009-11	Instructor
Univ. Mississippi Medical Center, Jackson, MS		2011-18	Assistant Professor
Univ. Mississippi Medical Center, Jackson, MS		2018	Associate Professor

PERSONAL STATEMENT

The focus of my research has been to understand the mechanisms by which central nervous system (CNS) signaling mechanisms and brain regions by which the leptin-melanocortin system axis differentially regulates metabolic and cardiovascular functions. We have generated novel genetic mouse models that allow us to unravel the role of the leptin-melanocortin pathway in specific brain nuclei which accompanied by our expertise in conducting acute and chronic sophisticated and integrative physiological studies in mice provide an unique and powerful approach to determine the complex circuits and signaling pathways of the CNS control of appetite, BP regulation, and metabolic function with broad implication for clinical treatment of cardiovascular and metabolic diseases.

My interest in obesity-induced hypertension led to investigate the renal mechanisms that mediate hypertension that develops in offspring from obese parents. Specifically, the renal mechanisms by which developmental programming of obesity and its metabolic abnormalities leads to activation of P2X purinoceptor 7 (P2X7R) and amplification of kidney injury, and how therapeutic interventions improve long-term chronic health in the offspring.

MAJOR RESEARCH INTERESTS

Cardiovascular and Neuroendocrine Physiology: Control of hemodynamics; mechanisms of hypertension and target organ injury; baroreflexes; obesity, leptin resistance, developmental origins of diseases.

PROFESSIONAL EXPERIENCE/POST GRADUATE TRAINING

- 1993-1996** Assistant Professor, State University of Paraiba, Campina Grande, State of Paraiba, Brazil
- 1996-2002** Assistant Professor, University of Tiradentes, Aracaju, State of Sergipe, Brazil
- 1996-1999** Graduate Student, Master in Physiology, Federal University of Pernambuco, State of Pernambuco, Brazil
- 2002-2006** Graduate Student – Doctorate in Physiology, University of Sao Paulo, State of Sao Paulo, Brazil
- 2006-2008** Postdoctoral Fellowship, University of Mississippi Medical Center, Dept. Physiology, Jackson, Mississippi, USA
- 2009-2010** Instructor, University of Mississippi Medical Center, Dept. Physiology, Jackson, Mississippi, USA
- 2011-2018** Assistant Professor, University of Mississippi Medical Center, Dept. Physiology, Jackson, Mississippi
- 2018** Associate Professor, University of Mississippi Medical Center, Dept. Physiology, Jackson, Mississippi

PROFESSIONAL MEMBERSHIPS

- 2006-present** Member, American Physiological Society
- 2006-present** Member, American Heart Association
- 1995-present** Brazilian Physiological and Therapeutics Society

FELLOWSHIPS, AWARDS, HONORS

- 1993-1996** Scholarship recipient, Pre-Doc, Coordination of the Improvement of Higher Education Personnel (CAPES), Research Foundation, Brazil
- 2002-2006** Doctoral fellowship grant from Coordination of the Improvement of Higher Education Personnel (CAPES), Research Foundation, Brazil
- 2003** Travel Award from Foundation of Support to Teaching and Research (FAEPA), University of Sao Paulo,
- 2004** Travel Award from Office of Dean for Doctoral Program (Pro-Reitoria), University of Sao Paulo

- 2007** Young Investigator Travel Award, Council for High Blood Pressure Research, Tucson, AZ
- 2011** American Physiological Society (APS)/NIDDK Minority Travel Fellowship Award, Experimental Biology 2011, Washington, DC.
- 2011-2014** Scientist Development Grant – American Heart Association (AHA)
- 2011** Finalist, Harry Goldblatt Award for New Investigators, American Heart Association, Council for High Blood Pressure Research
- 2012** Recipient, Harry Goldblatt Award for New Investigators American Heart Association, Council for High Blood Pressure Research
- 2013** Young Investigator Award, American Heart Association - Council for High Blood Pressure Research in Australia. Melbourne, Australia
- 2013** Excellence in Research Award – University of Mississippi Medical Center – Silver Medallion
- 2014** NISBRE Highlighted Poster, Mississippi IDeA Network of Biomedical Research Excellence (INBRE) Conference, Biloxi, MS – Cardiovascular Section
- 2016** Excellence in Research Award – University of Mississippi Medical Center – Gold Medallion
- 2017** Distinction in Scholarship; Selection for APS Select, *The American Journal of Physiology – Endocrinology and Metabolism*, article title: “Role of autonomic nervous system in chronic CNS-mediated antidiabetic action of leptin” APS Select.
- 2019** Distinction in Scholarship; Selection for APS Select, *The American Journal of Physiology – Regulatory, Integrative and Comparative Physiology* article title: **“Impact of leptin deficiency compared to neuronal specific leptin receptor deletion on cardiometabolic regulation**” APS Select.

RESEARCH

RESEARCH FUNDING

RO1 DK121411 (JM do Carmo, PI) 09/19/19 - 07/31/2022
3.6 calendar
NIH/NIDDK "Long-term consequences of parental obesity on developmental programming of cardiorenal diseases in offspring"
Role: PI

PO1 HL519717 (JE Hall, PI) 08/01/2014-05/31/2021
0.8 calendar
NIH/NHLBI "Cardiovascular dynamics and their control"
The major long-term goal of this project is to investigate the central nervous system signaling pathways that mediate the antidiabetic actions of leptin.
Role: Co-Investigator of Project I

P20 GM 104357 (JE Hall, PI) 09/05/2013-4/30/2023
0.8 calendar
National Institutes of Health, National Institute of General Medical Science
Cardiorenal and Metabolic Diseases Research Center
Role: Sub-Core Director, Basic Science

P20GM121334 (J Reckelhoff, PI) 12/01/2018-05/31/2022
0.8 calendar
National Institutes of Health, National Institute of General Medical Science
Role of microRNA-21 in the androgen-induced metabolic effects in Polycystic Ovary Syndrome – Mississippi Center of Excellence in Perinatal Research – Damian Romero (PI) - Project V.
Role: Co-investigator

Pending Research Support

R01 proposal (do Carmo, MPI)
\$586,101/year
NIH/NHLBI
"Parental obesity and developmental origins of cardiac dysfunction."
Role: Principal Investigator (MPI with Dr. da Silva)

Submitted Grants (not funded)

NIH – RO1 HL124761-01 02/24/2014 - Divergent control of metabolic and cardiovascular functions by leptin

NIH – RO1 HL124761-01A1 10/14/2014 - Divergent control of metabolic and cardiovascular functions by leptin

NIH – RO1 DK115522-01 06/29/2017 – CNS mechanism of glucose regulation

ORAL PRESENTATIONS AND PARTICIPATION AT NATIONAL AND INTERNATIONAL MEETINGS

1. Speaker, Parental obesity-induced programming of hypertension and cardiovascular diseases. Department of Physiology and Biophysics, UMMC - Jackson, MS, March, 2020.

2. Oral Presentation, Impact of leptin deficiency compared to neuronal specific leptin receptor deletion on cardiometabolic regulation. Council for High Blood Pressure Meeting. New Orleans, LA, September 8, 2019.
3. Speaker, Impact of parental obesity on developmental programming of cardiorenal diseases. Department of Physiology and Biophysics, UMMC - Jackson, MS, March, 2019.
4. Invited Speaker, Session: Obesity and Cardiometabolic Diseases Scientific Session. Impact of parental obesity on developmental programming of metabolic and cardiorenal dysfunction. Mississippi IDeA Conference 2019. Jackson, MS, August 2, 2019.
5. Invited Speaker, Session: Obesity, sleep disorder and arterial hypertension, is that your choice? Novel mechanisms for cardiovascular control and programming of obesity. "Regulation of metabolic and cardiovascular function by the brain leptin-melanocortin pathway: What is new? Rhythms of Life. Obesity, sleep disorder and atrial hypertension, is that your choice? Novel mechanisms for cardiovascular control and programming of obesity. IUPS, Rio de Janeiro, Brazil, August 1-5, 2017.
6. Invited Speaker Chronic inhibition of melanocortin 4 receptor (MC4R) attenuates hypertension-induced by intermittent hypoxia. Hypertension Research Exchange Program, School of Dentistry – Araraquara, UNESP, Sao Paulo, Brazil, August 7-9 2017.
7. Invited Speaker, CNS and glucose regulation – Department of Physiology, Ribeirao Preto, USP, Sao Paulo, Brazil, August 10, 2017.
8. Oral Presentation, Role of suppressor of cytokine signaling 3 (SOCS3) in the entire central nervous system in regulating metabolic and cardiovascular function in mice fed a high fat diet. Council on High Blood Pressure Meeting, San Francisco, CA. September 14-17, 2017.
9. Speaker, CNS control of glucose regulation by the leptin-melanocortin axis. Department of Physiology and Biophysics, UMMC - Jackson, MS, August, 2016.
10. Oral Presentation, Role of suppressor of cytokines signaling 3 (SOCS3) in modulating chronic metabolic and cardiovascular effects of leptin. Council on High Blood Pressure Meeting, Washington, DC. September 16-19, 2015.
11. Oral presentation, Brain endoplasmic reticulum (ER) stress reduces appetite and increases blood pressure independent of the melanocortin-4 receptor in rats. Washington, DC. September 16-19, 2015.
12. Invited Speaker, Role of suppressor of cytokines signaling 3 (SOCS3) in regulating chronic metabolic and cardiovascular effects of leptin - IDeA Networks of Biomedical Research Excellence (INBRE). Biloxi, MS. November 11-13, 2015.
13. Speaker, Role of the brain melanocortin system in regulating appetite, blood pressure and peripheral glucose utilization. Department of Physiology and Biophysics, UMMC - Jackson, MS, July, 2015.
14. Speaker, Control of metabolic and cardiovascular function by the brain melanocortin system. Department of Physiology and Biophysics, UMMC - Jackson, MS, July 2014.
15. Invited Speaker, Leptin reduces food intake but fails to raise blood pressure in mice with deficiency of insulin receptor substrate (IRS2) in the entire brain or

- specifically in POMC neurons. Council for High Blood Pressure Research in Australia. Melbourne, Australia, December 5-7, 2013.
16. Speaker, Metabolic and cardiovascular regulation by the brain leptin-melanocortin pathway. Department of Physiology and Biophysics, UMMC - Jackson, MS, January, 2013.
 17. Speaker, Metabolic and cardiovascular regulation by the CNS leptin-melanocortin pathway. Department of Physiology and Biophysics, UMMC - Jackson, MS, February, 2012. Oral presentation.
 18. Oral Presentation, Differential Control of Appetite and Cardiovascular Function After Selective Rescue of Melanocortin-4 receptor in Proopiomelanocortin Neurons. Finalist of the Harry Goldblatt New Investigator Award. 65th Annual High Blood Pressure Research Conference. Sponsored by the American Heart Association. Orlando, FL. September 22, 2011.
 19. Speaker, Divergent control of cardiovascular and metabolic function by leptin. Department of Physiology and Biophysics, UMMC - Jackson, MS, January, 2010. Oral presentation
 20. 16. Speaker, Divergent control of cardiovascular and metabolic function by the CNS leptin-melanocortin pathway. Department of Physiology and Biophysics, UMMC - Jackson, MS, August, 2009.
 21. Speaker, Cardiovascular and metabolic function in mice lacking leptin, MC4R or Shp2 in the CNS. Department of Physiology and Biophysics, UMMC - Jackson, MS, November, 2008.
 22. Speaker, Chronic central leptin infusion restores sympatho-vagal balance, cardiovascular variability and baroreflex sensitivity in diabetic rats. Council for High Blood Pressure Research in association with the Council on the Kidney in Cardiovascular Disease, Tucson, AZ, 2007.
 23. Invited Speaker, Aortic depressor nerve: Function and Morphology. Department of Physiology, University of Sao Paulo Medical College, Ribeirao Preto, SP, Brazil, March, 2006.
 24. Invited Speaker, Physical Activity and Free Radicals. Congresso Brasileiro de Fisioterapia. Salvador - State of Bahia – Brazil, 1997.

Scientific Sessions Chaired

- Featured Topic Co-Chair– Tissue-Distributed Control of Sex Differences in Diabetes and Cardiovascular Diseases, Experimental Biology, San Diego, CA, 2018
- Featured Topic Chair– Sex differences in Obesity and Cardiovascular Diseases, Experimental Biology, Chicago, IL, 2017
- Scientific Session Co-chair, Session: The Harry Goldblatt New Investigator Award, Council for High Blood Pressure, New Orleans, September 11-14, 2013
- Scientific Session Co-chair, Session: The Harry Goldblatt New Investigator Award, Council for High Blood Pressure, San Diego, September 9-12, 2014

SERVICE

Institutional Service

Reviewer for Institutional Research Project Grants (IRSP) – 2014

Judge Poster Presentation for School of Medicine Research day, April 2014, 2015, 2017, and 2019.

Trained multiple faculty, fellows and students in surgical techniques and laboratory methods

Judge Poster Presentation – Onsite Trainee Poster Award, Council for High Blood Pressure Meeting, AHA, San Francisco, CA, 2017

Service on Professional Society Committees

High Blood Pressure Council, Education Committee Member, 2013-2015

Council on Hypertension, American Heart Association, Awards Committee – 2014-present

Editorial Service/Reviewer for Journals

American Journal of Physiology, Regulatory, Integrative and Comparative Physiology

American Journal of Physiology – Heart and Circulatory Physiology

European Journal of Physiology

European Journal of Physiology, Pflugers Archives

The FASEB Journal

Hypertension

Journal of Diabetes

Journal of Neurophysiology

Grant Review Study Sections

American Heart Association, National, Peer Review, 2013-2014.

American Heart Association, Innovative Research Grant Review Committee, 2014, 2015

American Heart Association – National, Peer Review Committee, Cardiovascular (CVD1), 2013-present

Auckland Medical Research Foundation – AMRF Project Grant, New Zealand, 2013-present

Community Service

American Heart Association - participated as team captain for Heart Walk, Jackson, Nov, 2012.

Mississippi Phun Week, participated in respiratory function, Children's Museum, Nov, 2014.

Mississippi Phun Week, participated in gastrointestinal function, Children's Museum, Nov, 2015.

American Heart Association participated as volunteer, Jackson, Nov, 2016.

Mississippi Phun Week, participated in Renal function, Children's Museum, Nov, 2016.

My institutional and national services include training of multiple faculty, fellows and students in surgical techniques, experimental methods and equipment usage (including, but not limited to: implantation of DSI telemetry probes and software data analyses, uses of EchoMRI in physiological studies, acute and chronic metabolic studies in small rodents). I have also served as Ad-Hoc reviewer for multiple scientific Journals in the field of physiology and metabolism, and for grant applications from the American Heart Association and Auckland Medical Research Foundation.

TEACHING

Lecturer

State University of Paraiba/Brazil - Cardiopulmonary Physiology, Physical Therapy Continuing Education Courses- 25 hours/week, 1993-1996

University of Tiradentes, Sergipe/Brazil - Cardiopulmonary Physiology, Physical Therapy Continuing Education Courses - 30 hours/week, 1996-2002

University of Sao Paulo/Brazil - Summer Classes in Physiology- 15 hours/semester, 2004-2006

University of Mississippi Medical Center, Physical Therapy – Acid/Base Regulation – 1 hour, 2016 – Teaching Evaluations – Score: 3.82

University of Mississippi Medical Center, Physical Therapy – Acid/Base Regulation - 1 hour, 2017

University of Mississippi Medical Center, Physical Therapy – Acid/Base Regulation - 1 hour, 2018

MENTORING

Post-doctoral fellows

Fabio Gava, Ph.D. 2016-2018

Medical Student Research Trainees

Summer Research Program

Mark Pinkerton, Medical Student, Summer, 2014

Abdulla Alrayes, Medical Student, Summer, 2015 – Sponsored by Alfaisal University

Haley Houghton, Medical Student, Summer, 2013-2014, 2015-present, MSRP

David Duff, Medical Student, Summer, 2017

Winter Research Program

Giovanna Campos Micheloni, Medical Student, Winter, 2015-2016 - Sponsored by Barao de Maua University

Fernanda Stabile, Medical Student, Winter, 2016-2017 - Sponsored by Barao de Maua University)

Undergraduate Research Trainees

Nathan Freeman (Northwest Rankin High School; University Southern Mississippi, 2006-2011)

Jarrett Morgan (Belhaven College, 2009)

My education/teaching services for the past several years have been focused on mentoring and teaching postdoctoral fellows as well as spring/summer students. My teaching services include a combination of research training, laboratory meetings, and extensive teaching of basic principles of the scientific method, experimental design, data analysis, and presentation of data in abstracts, papers, and oral communications.

The overall goal was to expose the students to a stimulating research environment and to provide them with necessary basic foundation should they decide to pursue a career on basic/clinical research in the future. I am also lecturing Physiology classes to students of the Heath Related Professions. Also, I have been heavily involved in teaching postdoctoral fellows, students, technical staff and faculty members various surgical techniques and laboratory methods.
